

Barricade Plus

Tahoe LLC announces an additional option with their new performance finish. *Barricade™ Plus* is a permanent application that includes an antimicrobial barrier that will protect your fabrics from spills and stains plus with added protection to prevent the growth of bacteria, mold, and mildew.

The silver ion-based agent has inherent antimicrobial protection that helps prevent the growth of bacteria. This protection is long lasting as silver ions are not prone to evaporate or dissolve. This added protection does not contain Tricolsan or Triclocarban.

Barricade™ Plus is an antimicrobial agent with a metallic ion structure and is approved for textile use and registered by the US EPA.

Barricade™ Plus can be combined with your existing products. Call today and ask how we can make your fabrics or products safer from bacteria and viruses.
